ZUCCHELLI, P., *see* SASDELLI, M.

SUBJECT INDEX

Adenosine diphosphate
  lymphocyte subcellular localization, 321
Alpha-2 glycoprotein
  effects on Fc receptors and antigen expression, 350
Antibodies
  effect of cyclophosphamide on responses of, 178
  response to *Varicella zoster*, 98
  specificity to basement membranes in mice, 35
Antigen separation
  by immobilized protein A, 9
Antigens
  antibody response to, 508, 515
  immunosuppressive activity towards, 332
Antigen–antibody complexes
  detection of in food-allergic subjects, 44
Antiglobulins
  radioimmunoassay profile of, 547
Anti-tetanus antibody
  response of *in vitro*, 171
Arthritis
  enhanced mouse resistance to, 355
Atopic diseases
  hyperimmunoglobulinaemia in, 54
Autoantibodies
  analysis by ^{51}Cr-release assays, 565
  during *Schistosoma mansoni* infection, 89
Autoimmune antibodies
  and their light chains, 161
Autoimmune disorders
  Immune complex and rheumatoid factor relationship in, 259
Autoimmune orchitis
  in the mouse, 425

β-1H globulin
  deficiency of, in hypocomplementaemia, 110
β_2-microglobulin
  serum levels in haematological malignancies, 134
B cell
  activation during *Schistosoma mansoni* infection, 89
  evaluation of function, 196
  role in myasthenia gravis, 277
B lymphocytes
  enumeration of, in whole blood, 229
Bone marrow
  a major source of immunoglobulins, 1
Bone marrow cells
  effect of streptozotocin on, 627
Bovine adenosine deaminase
  properties in mice, 649

C3b
  deposition on yeast surfaces, 412
Carbohydrate
  role in nephritic factor, 120
Carcinomas
  increased T lymphocyte population with, 130
Cancer development
  and depressed immunity, 459
Cell antigens
  during glomerulonephritis, 397
Cell-mediated immunity
  in glomerulonephritis, 27
Cerebral trypanosomiasis
  and response to melarsoprol, 363
Coliac disease
  anti-gliadin antibodies in, 286
Colchicine
  action on suppressor cell deficiency, 77
Complement deficiency
  effect of renal transplantation on, 420
Complement solubilization
  capacity of, in immune complex disease, 557
Concanavalin A
  use of in immunoregulation studies, 237

C-reactive
protein, binding to lymphocytes, during glomerulonephritis, 397
Cyclophosphamide
effect of administration on antibody responses, 178
Cytotoxicity
of mononuclear cells, augmentation by bacterial lipopolysaccharide, 640

Depressed immunity
role in cancer development, 459
Disease development
using the rat as a model, 499

Fc receptors
inhibition of, during pregnancy, 350
on human leucocytes, 453
studies of, 575
Fibrinolytic enzymes
characteristics of release, 214
Fibroblasts
autoantibodies to, in renal transplant patients, 565
natural killing by leucocytes, 484
Food allergens
in atopic diseases, 54
Fulminant hepatic failure
defect in yeast opsonization in, 406

Glomerulonephritis
defective lymphocytes subpopulations in, 27
Glycoprotein characterization
using immunochemical techniques and electrophoresis, 530

H-2 mice
differences in antibody specificity, 35
Haematological malignancies
effects on β_2-microglobulin serum levels, 134
Hepatic non-parenchymal cells
properties and functions of, 581
Hepatitis
antibodies against liver-specific protein during, 382
Heteroantisera
suppressor lymphocyte identification by, 607
Hodgkin's disease
lymphocyte dysfunction, 313
Hypocomplementaemia
deficiency of β-1H globulin in, 110

IgA
concentration in IgA myeloma, 653
in coeliac disease, 286
IgA deficiency,
J chain synthesis by lymphocytes during, 142
IgE
response after antigenic stimulation, 621
IgE plasma cells
detection in jejunum, 301
IgG
autosensitization to, in rheumatoid arthritis, 521
receptors for, on human leucocytes, 453
use of in a quantitative assay, 544
IgG complexes
evaluation of tests for, 149
IgM rheumatoid factors
and IgG complexes, 149

Immune complex disease
capacity for solubilization in, 557
Immune complexes
detection of a specific antigen within, 44
solution by conglutinin, 9
isolation of, 443
antibody moieties within, 250
loss of during liver disease, 375
molecular analysis of, 521
quantitative assay of 541
relationship with rheumatoid factor, 259
separation by protein A, 9
Immune electron microscopy
demonstration of IgE plasma cells, 301
Immunosuppression
effects of on lymphocyte stimulation, 61
Immunosuppressives
comparative activity towards antigens, 332
Interferon
role in viral disease, 475

J chain
synthesis of during IgA deficiency, 142
J chain disease
evidence for, 305
J chain production
in absence of immunoglobulin, 305

Laboratory tests
use and abuse in clinical immunology, 662
Leishmania tropica
features of infection in mice, 493
Leucocytes,
Fc receptor distribution and properties, 453
inhibition of *Plasmodium falciparum* growth by, 106
lysing of virus-infected fibroblasts, 484
Levamisol
action on immunoglobulin production, 340
Liver disease
loss of T cell function and immune complexes during, 375
Liver-specific protein
antibodies against during hepatitis, 382
Liver-specific protein and apo-LSP
characterization of, 435
Lymphocyte adenosine diphosphate
kinetic properties, 321
Lymphocyte dysfunction
role of toxic oxygen metabolites in, 313
Lymphocytes
and generation of suppressor cells, 185
effect of methylprednisolone on, 206
further characterization of, 294
subpopulation identification by a heteroantiserum, 607
subpopulations and reactivity in scleroderma, 70
Lymphocyte stimulation
changes in during multiple sclerosis, 61
Lymphocyte subpopulations
during glomerulonephritis, 397
Lymphoid cells
role in J chain disease, 305

Methylprednisolone
effect on T lymphocyte colony function, 206

Monoclonal antibodies
anti-thyroglobulin activity of, 268
recognition of antigens by, 597
Monocytes
fibrinolytic enzyme release from, 214
Monocyte cytotoxicity
against *Trichomonas vaginalis*, 391
Mononuclear cells
spontaneous cytotoxicity of, 640
Mouse resistance
enhancement by killed *Corynebacterium parvum*, 355
Myasthenia gravis
B and T cell role in, receptor antibody formation in, 277
Mycobacterium tuberculosis
effect in suppressor factor production, 82

Neonatal thymectomy
and autoimmune orchitis, 425
Nephritic factor
structure and function, role of carbohydrate in, 120
Nephritis,
role of T cells in, 20
Nuclear antigens
autoantibodies to, 589

PAGE
use of in glycoprotein characterization, 530
Pepsin
digestion of immune complexes using, 250
Perioclontal disease
role of T_G lymphocytes in, 633
Plasmodium fulciparum
inhibition of growth by leucocytes, 106
Polyclonal antibodies
lack of cross-idiotypy with monoclonal antibodies, 268
Polyethylene glycol
attachment to bovine adenosine deaminase, effects of, 649
Protein A haemolytic plaque assay
evaluation of regulator cell function, 196

Renal transplantation
and complement deficiency, 420
effect on T cell subpopulation, 615
Renal transplant patients
autoantibodies in, 565
Rheumatoid factor
relationship with immune complexes, 259

Salmonella typhi
intestinal antibody response to, 515
serum antibody response to, 508
Scleroderma
effect on lymphocytes, 70
Serum immunoglobulins
bone marrow as a major source, 1
Serum sickness
influence of various antigen parameters on, 499
Serum viscosity
and intravascular IgA polymer concentrations, 653
Staphyloccocal protein A-Sepharose
advantages and limitations, 443
Streptococcal antigens
binding to lymphocytes, 397
Streptococci
with protein A-like activity, 225
Streptozotocin
effects on T lymphocytes and bone marrow cells, 627
Suppressor cells
in mixed lymphocyte reaction, 185
Suppressor cell deficiency
correction by colchicine, 77
Systemic lupus erythematosus absence of suppressor factor production in, 82
Systemic sicca syndrome
IgA level in, 547

T cells
autologous and allogenic, and anti-tetanus antibody response, 171
functional loss during liver disease, 375
inhibition by levamisol, 340
regulation of using Con A, 237
role in pathogenesis of nephritis, 20
role in myasthenia gravis, 277
subpopulation imbalances in renal transplant patients, 615
T_G cells
identification of, 294
T_γ cells
role in antigenic stimulation, 621
Thyroglobulin antibodies
clonality of, 161
T lymphocytes
angiogenesis-inducing capability, 327
effect of streptozotocin on, 627
enumeration of, in whole blood, 229
increases in population, with carcinomas, 130
reactions with the major histocompatibility complex, 589
sheep red blood cell affinity, 327
T_G lymphocytes
role in cell-mediated immunity, 633
T lymphocyte differentiation antigen
recognition by IgM monoclonal antibody, 597
T-regulator cell
evaluation of function, 196
Trichomonas vaginalis
monocyte cytotoxicity to, 391
Trypanosoma brucei brucei
response to Melarsoprol, 363

Varicella zoster
antibody response to, 98
Viral replication
regulation by Interferon, 475

Yeast
opsonization of, 412
in fulminant hepatic failure, 406
